FireProtect is a wireless smoke and inflammation detector furnished with a buzzer. It is designed for use indoors and can operate up to 4 years from the bundled batteries. FireProtect is connected to the Ajax security system via the protected Jeweller protocol, with an effective communication range of up to 1,300 meters without obstacles. It can operate off-line.

FUNCTIONAL ELEMENTS

To switch on the detector - press the on/off button for 3 seconds. The device is switched off in the same manner.

To switch off the siren sound, press on the logo or eliminate the cause of the actuated alarm.

LOCATION SELECTION

When selecting a FireProtect installation location, take into account the device remoteness from the hub and presence of any objects hindering the radio signal transmission.

The detector should be installed at the ceiling in the highest point where hot air and smoke will concentrate.

Do not install the detector:
1. Outside the premises (outdoors);
2. In places with fast air circulation (near a ceiling fan, air conditioner, air exhaust, open doors and windows);
3. Nearby any metal objects and mirrors causing radio signal attenuation or screening it;
4. In room with the humidity exceeding the allowable value.

Prior to the attachment of the detector to a surface with screws, please perform signal level test in the Ajax Security System application for at least a minute. This will demonstrate communication quality between the detector and the hub and ensures proper installation place selection.

1. Siren hole,
2. Light indicator combined with the touch button "Test",
3. Smoke chamber window, temperature detector behind the net,
4. SmartBracket attachment panel,
5. On/off button,
6. Tamper button,
7. QR code.

AUTONOMOUS USE

The FireProtect detector can be used autonomously, without connecting to a security system.

1. Switch on the detector and test the smoke chamber.
2. Determine the optimal location.
3. Install FireProtect on the surface.

In case of the autonomous use, the detector will notify of the detected fire/smoke, as well as any events insistent for the user with a sound signal and light of the logo. For more information, please see the User Manual.

IMPORTANT INFORMATION

This product can be used across all EU member states. This device in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

COMPLETE SET

1. FireProtect
2. Batteries CR2 (pre-installed) - 2 pcs.
3. Battery CR2032 (pre-installed) - 1 pcs.
4. Installation kit
5. Quick Start Guide.
